

# In with the NEW CONTAINERS

# Out with the OLD

# WHY?

To share between  
**4 households**

Reduce waste  
collection time

Reduce noise  
and pollution

As part of the continuous efforts of Abu Dhabi Waste Management Center – Tadweer to improve the quality and efficiency of its service for enhancing the quality of life of Abu Dhabi Emirate Residents and being aligned with Abu Dhabi Emirate objective, Tadweer is replacing the 240 litre waste bins with bigger 1,100 litre waste containers at the areas outside Abu Dhabi City. As larger capacity containers contribute to the improvement of the cleanliness of our areas and maintain the overall general appearance; in addition to reduce the waste collection time which in turns reduce the pollution that may result from the carbon emissions of waste collection vehicles. Also, Tadweer will continue implementing its ongoing strategy of providing sustainable environment solutions as the green containers for recyclable materials like the glass and paper cardboard will be distributed in neighborhoods to support Tadweer goal of building an integrated waste management system in the Emirate of Abu Dhabi.
